# SEARCHING ROADRUNNER

Search for Roadrunner Submissions and Existing PolicyCenter accounts.

The link to PolicyCenter has been replaced with a single search function that lets you search for both new submissions created through Roadrunner and all existing accounts.

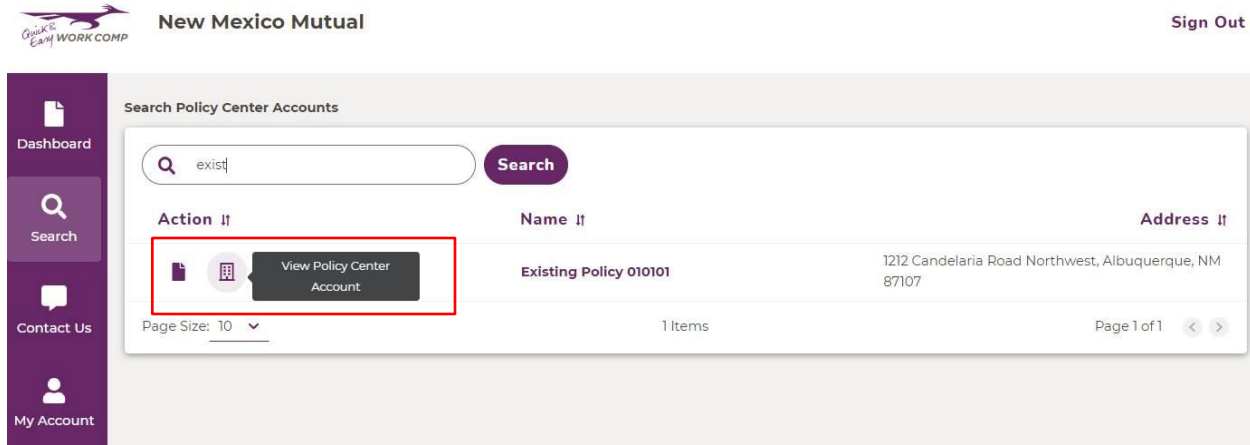

This search function pulls existing accounts and policies along with submissions created through Roadrunner. You can search by Account Name, Account Number, Policy Number, and Submission Number.

From the action column, you can "Continue" unfinished submissions or "Bind" active submission.

In the screenshot above, the search returned 2 results: an existing policy with links under the action column to view the documents in Roadrunner, and a second link that redirects to the PolicyCenter account.

Existing Policies

Accessing existing PolicyCenter accounts is easy! Simply use the single search function to find the account by account name, account number, or policy number, and click the link to PolicyCenter.

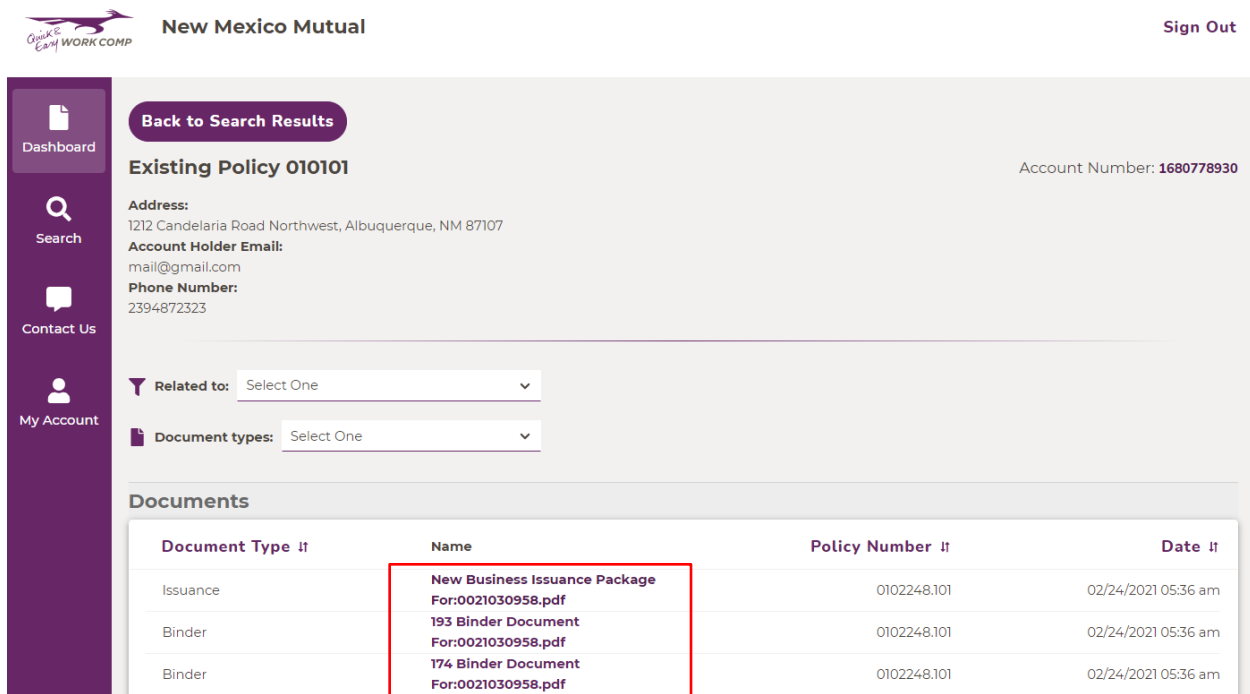

Clicking the Name or Document icon will direct you to a Roadrunner page with links to all documents available in PolicyCenter, along with filter options by the policy term and type of document. The Account Number link on this page will also take you into the PolicyCenter account.

Submissions

The submissions page now displays information from the submission, along with links to the PolicyCenter Account, and another link to "Continue" the unfinished submission. The documents are also available with filters after the quote package has been printed.
